OUR STORY

Nightingale is a lifestyle magazine and website targeted towards young women, with tastes for both the eclectic and traditional. It's the home of things beautiful and cool, prim and wild at the same time. Located in San Jose, California, this mid-size media company has goals to reach a broader national and global audience with their digital content. The name "Nightingale" is inspired by the Keats poem, because beauty, both simple and dazzling, is an exceptional component of living well. Nightingale promotes meaningful consumption: fashion, furniture, and foods that will inspire, and enhance the real world experience. The Nightingale girl has her favorite novels placed casually on a lacquered cedar coffee table, next to hydrangeas in mason jar vases of course. She comments exactly what she thinks under our online post about the top ten cocktails to make a dinner party electric. Our publication will cover fashion, food, interior design, beauty, and nightlife, all for the girl who is both bookish and social.
